

## *When two destinies cross paths*

The life of a Jaeger-LeCoultre watch truly begins on the wrist of the man or woman who wears it. Such a creation is not an end in itself, but rather a starting point that opens a whole new world. A creation gives new meaning to reality and reveals sensitivities. One creation always inspires another. Everything is interwoven, as stories intersect, the quest for perfection is shared, and a love of beautiful things is nurtured. A creation is always unique because it merges with the imagination to reflect a destiny that's truly yours.

Open a whole new world

## A LEGACY OF HIGH STANDARDS

---

### *The Vallée de Joux, where a legacy was forged*

The Vallée de Joux is a remote valley of the Swiss Jura mountains, where the determination of its inhabitants has been forged by a harsh climate of stark contrasts. For more than 180 years, the Jaeger-LeCoultre Manufacture has been characterised by high standards, natural restraint, and a refusal to indulge in ostentation. Its mastery of the watchmaking art, born from a need to open up to the world in order to survive, is expressed through the inherent strength of its creations.

*Our creations open up whole new horizons  
for those who love the finer things in life.*

## CREATIVE INSPIRATION

### *The inner strength of the Manufacture*

Exercising 180 skills united under one roof, men and women driven by a shared passion pool their expertise in a tireless stream of inventive creativity. It is this inner strength that has instilled life and soul into the Grande Maison since 1833.

*Giving life to each movement,  
mastering every gesture and stirring  
deep feelings.*

## MEANINGFUL INVENTIONS

*Above and beyond performance,  
infusing functions with purpose*

The fact that Jaeger-LeCoultre devotes the full force of its inventiveness to serving useful functions and complications is grounded in its conviction that a creation is only meaningful if it becomes part of one's day-to-day existence and experience. It is only truly revealed through the individual who wears it.

*An invention must serve life and  
provide another view of living.*

## THE QUEST FOR EQUILIBRIUM

### *Seeking balanced precision*

Each of Jaeger-LeCoultre's creations stems from a subtle harmony between mechanical performance and aesthetic elegance: a constant quest in which horological complications must serve simplicity, and design must favour legibility.

*Imagining an unknown world, setting out  
to explore it and seeing it spring to life.*

Master the Watchmaking Art  
and go beyond it.

### *Rare and precious emotional appeal*

A Jaeger-LeCoultre timepiece inspires contemplation and discovery; it invites observers to pause and admire a creation, view the way the light plays over it and its subtle texture, listen to the heart of the watch, and strive to perceive every detail that makes it tick. It harbours all the passion of the artisans who have created it.

### *Stirring sensitivity*

A Jaeger-LeCoultre watch is always unique because of its intrinsically intimate nature. It is inseparable from the man or the woman who wears it and becomes an extension of themselves, forming an intense relationship in which reality leaves ample scope for the imagination, and indeed inspires it.

# Reverso

*85 years of surprises and unexpected revelations*

Since its creation in 1931, the Reverso has been perpetually renewed while remaining loyal to its essence: its swivelling case and pure, Art Deco-inspired lines. Its timeless face, framed by its three iconic gadroons, continues to enchant men and women who love fine objects. Right from the start, the Reverso was also designed in feminine versions. To celebrate its birthday, this iconic model is reinvented through three distinct versions that afford a wealth of surprises.

Why does it turn over? The Reverso arose from the challenge to develop a watch able to withstand the rough and tumble of polo matches, among British colonial army officers stationed in India. The case swivels to reveal a solid back that protects the dial from potential knocks from polo mallets. It's an ingenious solution.

Swivelling the watch reveals another face of the Reverso: a blank page that leaves room for personalisation by engraving, gem-setting, or enamelling. The same movement can also uncover a second dial. The Duetto and Duo concepts were born from the unique horological expertise of the Grande Maison.

It's entirely up to you to find the Reverso that best resembles you.

# Reverso Classic

*A timeless, endlessly seductive personality*

Elegant, pure, and refined, the Reverso Classic embodies a timeless landmark in contemporary watchmaking. Its swivel case and Art Deco design have not aged a bit since 1931, making it a truly iconic model. Its geometrical case, gadroons, and straight Arabic numerals, along with its railtrack minute circle, make light of passing time and fleeting passions. The Reverso remains the obvious choice for men and women who cultivate a fondness for understated elegance.

# Reverso Classic Small

*Pure dial*

The pure, airy dial expresses timeless style. Its background is adorned with a fine, sunburst guilloché pattern and surrounded by a railtrack minute circle, while its pure, symmetrical lines are emphasised by its Arabic numerals.

*Curvaceous case*

The lines of the case have been slightly rounded by the Manufacture’s artisans to follow the shape of the wrist and ensure a more comfortable fit.

*Scope for imagination*

The back of the watch, revealed by a simple swivel of the case, welcomes a secret engraving or gem-setting. Let your imagination run free.

*Jaeger-LeCoultre Calibre 657*

Quartz movement.

**Functions:** hour, minute.

**Material available:** stainless steel.

**Strap/Bracelet:** alligator leather, stainless steel.

**Case:** reversible, comprising over 50 parts, size: 34 x 21 mm.

**Water resistance:** 3 bar.

Ref. 261 81 30  
Stainless steel/stainless steel

# Reverso Classic Medium

*Automatic movement*

The watch is equipped with an automatic movement for greater convenience. It's housed within a case whose size flatters both male and female wrists.

*Symmetry and light*

The highly symmetrical dial presents clear, pure lines emblematic of the Art Deco style. The watch design highlights a subtle interplay of light that is expressed through the contrast of the satin-brushed rim dial and the delicate guilloché decoration.

*And the watch is yours...*

Write your own story by personalising your watch with an engraving of meaningful initials or landmark dates in your life on the back. Immortalise a happy event on this beautiful object and keep it with you always.

*Jaeger-LeCoultre Calibre 965*

Automatic mechanical movement, 197 parts, 28,800 vibrations per hour, 38-hour power reserve.

**Functions:** hour, minute.

**Material available:** stainless steel.

**Strap:** alligator leather.

**Case:** reversible, comprising over 40 parts, size: 40.1 x 24.4 mm.

**Water resistance:** 3 bar.

Ref. 253 84 20  
Stainless steel/leather

# Reverso Classic Small Duetto

*Art Deco dial*

Framed by its three legendary gadroons, the front displays pure, geometrical lines that epitomise the Art Deco style of the watch. Everything about this dial radiates an unmistakeable sense of subtle understatement, from its baton-type hands and numerals to its railtrack minute circle, and brushed or guilloché finishes.

*Sparkling after-dark persona*

If night is falling, swivel the case in one smooth move to reveal a more sophisticated face of your watch. Slender dauphine hands, a sunburst black dial, and rows of diamonds on either side of the case make it a true gem for your evenings.

*Jaeger-LeCoultre Calibre 844*

Manually wound mechanical movement, 100 parts, 21,600 vibrations per hour, 38-hour power reserve.

- Functions: hour and minute, identical on both faces.
- Materials available: 18-carat pink gold, stainless steel.
- Gem-setting: 30 diamonds, approx. 0.28 carats. F-G, VVS diamonds.
- Strap/Bracelet: alligator leather, 18-carat pink gold, stainless steel.
- Case: reversible, comprising over 50 parts, size: 34 x 21 mm.
- Water resistance: 3 bar.

Ref. 266 24 30  
Gem-set 18-carat pink gold/leather

# Reverso Classic Medium Duetto

*Daytime face*

By day, the light-toned front dial displays the classic elegance of the iconic Reverso. The clear-cut lines of the numerals and baton-type hands are complemented by pleasing symmetry and a delicate central guilloché motif. It displays exactly the kind of visual harmony that has forged the reputation of this unequivocally stylish object.

*Elegant evening dress*

Accentuated on either side by an elegant row of diamonds, the back of the watch becomes the perfect companion for your evenings, sparkling in the muted light of an intimate dinner. Its black dial beautifully complements a refined evening outfit.

*Automatic movement*

Equipped with an automatic movement, the watch is even more user-friendly for the woman wearing it. An attentive eye will note the black disc of the oscillating weight in the center of the dial, a charming watchmaking detail.

*Jaeger-LeCoultre Calibre 968/A*

Automatic mechanical movement, 207 parts, 28,800 vibrations per hour, 38-hour power reserve.

- Functions: hour and minute, identical on both faces.
- Materials available: 18-carat pink gold, stainless steel.
- Gem-setting: 30 diamonds, approx. 0.42 carats. F-G, VVS diamonds.
- Strap/Bracelet: alligator leather, 18-carat pink gold, stainless steel.
- Case: reversible, comprising over 50 parts, size: 40 x 24.4 mm.
- Water resistance: 3 bar.

Ref. 257 84 20  
Gem-set stainless steel/leather

# Reverso Classic Large Duo

*An iconic face*

The front dial showcases a travel time zone with the signature Art Deco lines of the Reverso. Displayed on the back of the watch, the elegant day/night indicator tells you at a glance whether it is day-time or night-time in the country of reference.

*A sophisticated back*

Rounded, with hour markers arranged in the shape of a sun, the dial on the back of the watch provides a charming contrast to the straight lines of the front dial. The black background with a “clous de Paris” finish elegantly catches the light.

*Automatic movement*

The watch is equipped with an automatic movement for greater convenience. The oscillations of the weight driving the mechanism are a sight to behold against the black background of the dial.

*Jaeger-LeCoultre Calibre 969*

Automatic mechanical movement, 229 parts, 28,800 vibrations per hour, 38-hour power reserve.

**Functions:** front: hour and minute of the 2<sup>nd</sup> time zone, 24-hour indicator; back: hour and minute.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** reversible, comprising over 50 parts, size: 47 x 28.3 mm.

**Water resistance:** 3 bar.

18-carat pink gold/leather

## Atelier Reverso

*A backstage look at imagining  
your watch*

Choosing one's very own Reverso is a powerful, extremely intimate act. To celebrate the 85<sup>th</sup> birthday of this iconic model, Jaeger-LeCoultre offers various ways to personalise your watch; the material or the colour of the strap, the motif of the engraving, or the colour of

the dial on the back provide a broad range of interpretations. It enables each individual to find the model that most closely resembles their personal style, whether that is in blue, pink, white, mother-of-pearl, or set with diamonds. It is an intense and emotional experience.

# ENGRAVING

*Like a blank page, the back gives free reign to your imagination.*

Swivelling the watch of certain Reverso models (Classic or One) reveals a solid case-back that provides an ideal backdrop for the art of en-

graving. Within this area, the Jaeger-LeCoultre artisans will be able to bring your wishes to life: initials, a coat-of-arms, a date marking a happy event,

or a cherished motif. Give free rein to your imagination and immortalise a secret on an object that will always be with you.

# STRAPS

*A palette of colours and materials  
to adorn the strap on your wrist*

In a fanciful mood? Feel like matching your watch with your outfit or mood? Let your heart do the talking by choosing from a multitude of refined colours and ma-

terials offered by the Atelier Reverso. Calfskin, alligator with large or small scales, ostrich leather, and satin are available in pink, blue, red, or green, creating a broad

variety of finishes and shimmering reflections. Choose several to liven things up and let your watch surprise you with each change of strap.

# DIALS

*Infuse your watch with the face of your dreams*

The backs of the Duetto and Duo models enable you to express yourself through a range of dials in various colours and materials such as blushing pink, deep blue, magnetic grey, or flaming red. Each tone gives a dis-

tinctive vibrancy to the model. Some dials also come with an ivy motif that infuses them with lively elegance. The magnetic presence of gems such as lapis lazuli, blue aventurine, and meteorite stones may adorn

this face. Finally, certain limited editions may be adorned with gem-setting on the hour-markers and even the centre of the dial, to give the watch a precious sparkle.

## Reverso One

*It wins your heart at first glance*

An anthem to femininity, the Reverso One embodies every imaginable nuance within a collection of models nurtured by boundless creativity. Recapturing the elongated shape of the original women's Reverso model, created in the early 1930s, it is enlivened by a resolutely contemporary, dynamic spirit. Its Arabic numerals appear to be lightly traced by hand, and the angles of its face are delicately accentuated, as they were

initially. Its pleasing shapes beg to be caressed by a finger that swivels the case and reveals the unexpected. Another, more sophisticated dial, to accompany your evenings, or a solid back to host special words and secrets, awaits those who wear it. It is the kind of model that inspires love at first sight and makes your heart skip a beat. When you recognise yours, it will forever and always be “the One.”

# Reverso One Réédition

*Delicate and graceful*

Long and slim with extremely narrow dimensions, the case reproduces the proportions of the first 1930s Reverso watches for women.

*Vintage inspiration*

As with the original model, the angles that enclose the Arabic numerals emphasise the four sides of the dial.

*The little black dress*

Clad in all black, from the deep dial to its matching strap, the watch is like a little black dress: discreet, feminine, and perfect for any occasion.

*Jaeger-LeCoultre Calibre 657*

Quartz movement.

**Functions:** hour, minute.

**Material available:** stainless steel.

**Strap:** alligator leather.

**Case:** reversible, comprising over 40 parts, size: 32.5 x 16.3 mm.

**Water resistance:** 3 bar.

Ref. 325 84 70  
Stainless steel/leather

# Reverso One Cordonnet

*The 1930s look*

Inspired by a Jaeger-LeCoultre model from 1936, the watch displays the rounded Arabic numerals and dauphine hands of the period. Small, delicately traced angles emphasise the watch's refined features and its appearance passes effortlessly from era to era, without ever showing its age.

*The merging of materials*

Combining pink gold and steel, and reproducing the understated lines of the Art Deco style, the case seems like a jewel adorning the wearer's wrist. In a subtle detail, the slender rings that tie around the cords match the pink gold colour of the dial.

*Cordonnet strap*

A delicate leather link that passes through the case clasps around the wrist by a discreet buckle. It is just the right touch to make this model a rare original, sure to seduce any woman of character.

*Jaeger-LeCoultre Calibre 657*

Quartz movement.

**Functions:** hour, minute.

**Materials available:** 18-carat pink gold and stainless steel.

**Strap:** calfskin.

**Case:** reversible, comprising over 40 parts, size: 33.8 x 16.3 mm.

**Water resistance:** 3 bar.

Stainless steel and 18-carat pink  
gold/leather

# Reverso One Duetto Moon

*Timeless beauty*

The model's features take their inspiration from the first Reverso ladies' watches of the 1930s. They display great simplicity that endures across time through its blued steel dauphine hands, slightly rounded Arabic numerals, and angles that highlight the delicacy of the lines. An elegant, sunburst guilloché finish enhances the whole piece and is reproduced on the horns, as a final surprise before changing the dial.

*Night face*

As night falls, simply turn the case over in a single movement to allow your gaze to plunge into a starry night sky, represented by the gently twinkling dial. The majestic mother-of-pearl moon phase display gracefully progresses as the hours and minutes pass, a poetic face enhanced by two rows of diamonds.

*Jaeger-LeCoultre Calibre 842*

Manually wound mechanical movement, 129 parts, 21,600 vibrations per hour, 38-hour power reserve.

- Functions: hour and minute, identical on both faces, moon phases.
- Materials available: 18-carat pink gold, stainless steel.
- Gem-setting: 28 diamonds, approx. 0.32 carats. F-G, VVS diamonds.
- Strap/Bracelet: alligator leather, 18-carat pink gold, stainless steel.
- Case: reversible, comprising over 60 parts, size: 40.1 x 20 mm.
- Water resistance: 3 bar.

Ref. 335 21 20  
Gem-set 18-carat pink gold/18-carat  
pink gold

# Reverso One High Jewelry

*Dazzling femininity*

This jewellery watch is adorned with baguette-cut diamonds and set with all the expertise of Jaeger-LeCoultre’s master jewellers. The dial is surrounded by three rows of diamonds, reproducing the Reverso’s emblematic gadroons. The horns of the watch have two different finishes, giving rise to rays of light that accompany the turning of the case.

*Mother-of-pearl, mother of time*

The slightly rounded Arabic numerals, seemingly drawn by hand, are gracefully distributed around the mother-of-pearl dial. The smoothness of its surface is highlighted by the purity of the diamonds around the dial’s perimeter.

*Stellar beauty*

The Duetto concept equips the watch with an alternate face on the reverse side. On a black aventurine dial, diamonds trace the perimeter of the hour and minute display, like a sprinkling of stardust scattered over its depth.

*Jaeger-LeCoultre Calibre 844*

Manually wound mechanical movement, 100 parts, 21,600 vibrations per hour, 38-hour power reserve.

- Functions: hour and minute, identical on both faces.
- Material available: 18-carat white gold.
- Gem-setting: 250 diamonds, approx. 5.65 carats. F-G, VVS diamonds.
- Strap: satin.
- Case: reversible, comprising over 40 parts, size: 36.3 x 18 mm.
- Water resistance: 3 bar.

Ref. 336 34 90  
18-carat white gold/satin

## Reverso Tribute

*When the heritage of the Grande Maison  
meets the latest horological innovations*

The inspiration behind the Reverso Tribute stems from the very heart of Jaeger-LeCoultre's horological expertise. The wealth of its complications highlights the talent of the artisans, who work hand in hand daily, to enchant devotees of fine watchmaking. The homage paid to the Maison's heritage is also conveyed through the collection's design. The faces of the watches are inspired by the original men's

Reverso models. The "1931" spirit is reflected in the bold dial colours and vintage-style baton-type hands. Taking horological pleasure up another notch, all Tribute timepieces are endowed with the Duo concept that enables a second time zone display on back-to-back dials. In an additional exquisite surprise, the sunburst guilloché motif that adorns the case cradle elegantly accompanies its gentle swivel.

# Reverso Tribute Duo

*Vintage look*

The front of the watch, with faceted applied hours markers, is inspired by the features of the original 1931 model. The bold blue of the dauphine hands stands out elegantly against the grained background. The rounded small seconds contrasts with the straight lines, while echoing the face of the watch on the back.

*The blue of time*

Plunged into a deep blue, the lines on the back of the watch become rounded to showcase the hours and minutes display of the second time zone, as well as the day/night indicator. A “clous de Paris” guilloché decoration imbues the background of the dial with an attractive textured appearance.

*Jaeger-LeCoultre Calibre 854A/2*

Manually wound mechanical movement, 160 parts, 21,600 vibrations per hour, 42-hour power reserve.

**Functions:** front: hour and minute; back: hour and minute of the 2<sup>nd</sup> time zone, seconds, 24-hour indicator.

**Material available:** stainless steel.

**Strap:** alligator leather.

**Case:** reversible, comprising over 60 parts, size: 42.9 x 25.5 mm.

**Water resistance:** 3 bar.

Ref. 390 84 20  
Stainless steel/leather

# Reverso Tribute Calendar

*Full calendar*

The subtly grained dial on the front adopts the features of the 1931 model with face-  
ted applied hour markers. It showcases a complete calendar, comprising the day and  
month in two apertures, and the date and moon phases in the display at 6 o'clock.

*The moon in relief*

In a testament to the pure watchmaking sophistication of this timepiece, the moon  
phases have been hand-hammered by Jaeger-LeCoultre's craftsmen for a textured  
result that conjures a perfect representation of the moon.

*Deep grey*

Plunged in a deep, anthracite grey and enhanced by a "clous de Paris" guilloché finish,  
the dial is an elegant companion to the pink gold case. A day/night indicator and a  
second time zone are featured prominently within the rounded lines.

*Jaeger-LeCoultre Calibre 853*

Manually wound mechanical movement, 283 parts, 21,600 vibrations per hour, 42-hour power  
reserve.

**Functions:** front: hour and minute; back: hour and minute of the 2<sup>nd</sup> time zone, day, month, date,  
moon phases, day/night indicator.

**Material available:** 18-carat pink gold.

**Strap:** alligator leather.

**Case:** reversible, comprising over 60 parts, size: 49.4 x 29.9 mm.

**Water resistance:** 3 bar.

Ref. 391 24 20  
18-carat pink gold/leather

# Master

*Classicism, reliability, performance*

With its Master line, Jaeger-LeCoultre treats men to a range of refined, round watches, brimming with personality. Models combine aesthetic appeal and performance to ensure daily pleasure on the wrist. These are timepieces that wearers establish a loyal relationship with and will find their way through the ages with inimitable elegance. At the very heart of our skills, the Master line embodies the quintessence of a certain approach to watchmaking: the kind that sets a signature touch to a style and, without any undue show, infuses an additional aura of charm. Three collections with distinct characteristics – Master Ultra Thin, Master Control and Master Grande Tradition – enable fine watchmaking enthusiasts to find the model that best suits them.

## Master Ultra Thin

*Stripped of the superfluous,  
embodying quintessential classicism and purity*

Inspired by the first ultra-thin watch, created by Jaeger-LeCoultre in 1907, the models in this range have preserved its essence, taking minimalism to the ultimate degree of sophistication. Despite their slender frame, these watches also accom-

modate traditional complications, such as moon phases, tourbillons, and perpetual calendars. The slimmest model in the collection is a mere 3.6 mm thick. The Master Ultra Thin watches are a perfect blend of lightness, slenderness, and functionality.

# Master Ultra Thin 1907

*As slim as possible*

At just 4.05 mm thick, the Master Ultra Thin 1907 is one of the world’s slimmest manually wound mechanical watches.

*Thin as a blade*

The remarkably slender, “knife-shaped” pink gold case reflects the curves of the pocket watch created by the Manufacture in 1907. The extremely narrow case lugs reinforce the delicate nature of this watch.

*Pencil lines*

Like the fine strokes of a pencil, the hour-markers take the form of traditional transfers, such as those found on a vintage pocket watch, endowing this delicately grained, white dial with a sense of great purity.

*Jaeger-LeCoultre Calibre 849*

Manually wound mechanical movement, 123 parts, 21,600 vibrations per hour, 35-hour power reserve.

**Functions:** hour, minute.

**Material available:** 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 39 mm diameter.

**Water resistance:** 3 bar.

Ref. 129 25 20  
18-carat pink gold/leather

# Master Ultra Thin

*Small yet significant seconds*

The small seconds display, enlivening the dial at 6 o'clock, is a subtle nod to horological refinement and highlights the precision of the ultra-thin automatic winding movement that drives this watch.

*Dauphine hands*

A signature feature of the Master line, the warmth of the pink gold dauphine hour-markers and hands of the Master Ultra Thin watch perfectly matches the eggshell-coloured dial base.

*Symmetrical harmony*

The symmetry of the dial and its pure lines create a delightfully harmonious visual effect.

*Jaeger-LeCoultre Calibre 896*

Automatic mechanical movement, 223 parts, 28,800 vibrations per hour, 43-hour power reserve.

**Functions:** hour, minute, small seconds.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 38.5 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 127 25 10  
18-carat pink gold/leather

# Master Ultra Thin Date

*Minimalist classicism*

This model, with its ageless design, will appeal to devotees of pure lines looking for a discreet and refined watch.

*Finesse and transparency*

Housed within a case measuring just 7.45 mm thick, the automatic winding Jaeger-LeCoultre movement and its 22-carat pink gold oscillating weight are revealed through the sapphire crystal case-back.

*Signed by the date*

The date appears through a 6 o'clock window on the delicately silver-toned dial.

*Jaeger-LeCoultre Calibre 899*

Automatic mechanical movement, 219 parts, 28,800 vibrations per hour, 38-hour power reserve.

**Functions:** hour, minute, central seconds, date.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 40 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 128 84 20  
Stainless steel/leather

# Master Ultra Thin 41

*Ultra-thin movement*

This watch is powered by an extremely precise and reliable ultra-thin automatic winding movement, admirably epitomising the expertise of the Jaeger-LeCoultre watchmaking artisans.

*41 mm of expression*

Discreet yet confident, this watch affirms its personality through its 41 mm-diameter case.

*The dial as a canvas*

Like a precious canvas, the eggshell-coloured dial delicately highlights the pink gold dauphine hands and hour-markers.

*Jaeger-LeCoultre Calibre 898C*

Automatic mechanical movement, 195 parts, 28,800 vibrations per hour, 43-hour power reserve.

**Functions:** hour, minute.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 41 mm diameter.

**Water resistance:** 5 bar.

Ref. 133 25 11  
18-carat pink gold/leather

# Master Ultra Thin Réserve de Marche

*Autonomy on display*

Like a fuel gauge, the power-reserve indicator between 10 and 11 o'clock reveals the number of hours that the watch will continue operating without being worn. Its automatic movement means that it is rewound simply by moving one's wrist.

*Rich understatement*

Enriched by a trio of indicators - power reserve, pointer-type date display between 2 and 3 o'clock, and small seconds at 6 o'clock -, this watch radiates refined understatement and dynamic elegance with its pure design.

*Timeless buckle*

In the charming manner of traditional watches, the leather strap is fastened like a belt thanks to its pin buckle. It provides a familiar gesture and a comfortable feel against the skin.

*Jaeger-LeCoultre Calibre 938*

Automatic mechanical movement, 273 parts, 28,800 vibrations per hour, 43-hour power reserve.

**Functions:** hour, minute, small seconds, date, power reserve.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 137 84 20  
Stainless steel/leather

# Master Ultra Thin Moon

*Expressive finesse*

This delightfully discreet watch houses moon-phase and date functions within a case that is less than one centimetre thick.

*A view of the movement*

An open window into the mysteries of the movement, the sapphire case-back reveals the extremely slim Jaeger-LeCoultre Calibre 925 that measures just 4.9 mm thick. The watch is automatically wound by the steady to-and-fro motion of the 22-carat gold oscillating weight.

*Curvaceous moon*

The delicately rounded moon-phase display and finely engraved dial create a pleasing volume effect, further accentuated by the concentric date indicator that embraces both functions.

*Jaeger-LeCoultre Calibre 925*

Automatic mechanical movement, 246 parts, 28,800 vibrations per hour, 38-hour power reserve.

**Functions:** hour, minute, central seconds, date, moon phases.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 136 25 20  
18-carat pink gold/leather

# Master Ultra Thin Perpetual

*An emblematic complication*

Three counters of identical dimensions display the perpetual calendar functions: the day of the week at 9 o'clock, the calendar at 3 o'clock, and the month at 6 o'clock. Above the dial, a discreet moon-phase indicator pursues its progression, displaying the ever-changing lunar profile in its wake.

*Extreme thinness*

With a thickness of only 9.2 mm, the model's stainless steel case houses an ultra-thin movement of great sophistication, representing the multiple skills of the Grande Maison.

*Deep black*

With a deep black, sunray-brushed dial, the watch features an original, strong design, which extends to the alligator-skin strap of the same colour. The golden-brown moon appears equally as intense at 12 o'clock.

*Jaeger-LeCoultre Calibre 868*

Automatic mechanical movement, 336 parts, 28,800 vibrations per hour, 38-hour power reserve.

**Functions:** hour, minute, central seconds, perpetual calendar: day, month, date, four-digit year, moon phases.

**Materials available:** 18-carat white gold, stainless steel.

**Strap:** alligator leather.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 130 84 70  
Stainless steel/leather

# Master Ultra Thin Tourbillon

*Pure elegance*

In perfect harmony, the hour-markers on the lowest section of the dial make way for the show performed by the tourbillon. This watch, measuring just 11.3 mm thick, offers a rare and harmonious blend of expertise and refinement.

*Head-spinning lightness*

With its carriage made of light and resistant grade-5 titanium, this tourbillon is the epitome of lightness on both aesthetic and material levels.

*On the other side of the looking glass*

To prolong the visual delights of discovering this watch, the sapphire crystal reveals the Jaeger-LeCoultre Calibre 982 that beats at a rate of 28,800 vibrations per hour, a frequency that ensures enhanced stability when the watch is worn, and thus, greater precision.

*Jaeger-LeCoultre Calibre 982*

Automatic mechanical movement, 262 parts, 28,800 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, small seconds at 6 o'clock, tourbillon.

**Materials available:** 18-carat white gold, 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 40 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

# Master Ultra Thin Squelette

*The beauty of skeleton working*

The art of empty spaces is raised to the rank of a true art form. The ultra-thin movement of this watch has been entirely openworked by the nimble fingers of the skeleton-working artisan, who exercises his craft within the Grande Maison. A delicate operation reveals the intricacies of the gear wheels in their purest possible form.

*The art of guillochage*

Each compartment that's dedicated to timekeeping is adorned with a guilloché motif that imparts a pleasing visual rhythm on the overall appearance of the watch.

*An extension on the back*

Upon swivelling the timepiece, where even the slim caseband has been delicately engraved, the eye is immediately drawn to the openworked movement that is visible through the sapphire crystal case-back.

*Jaeger-LeCoultre Calibre 849A SQ*

Manually wound mechanical movement, 119 parts, 21,600 vibrations per hour, 33-hour power reserve.

**Functions:** hour, minute.

**Materials available:** limited series of 100 pieces in 18-carat white gold and 100 pieces in 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 38 mm diameter, sapphire crystal case-back.

**Water resistance:** 3 bar.

# Master Control

*Understated elegance: a line that associates a classic aesthetic with technical performance.*

The Master Control collection is the supreme expression of refined, watchmaking traditions, meticulously cultivated by Jaeger-LeCoultre. Equipped with a wide range of functions, the Master Control models unite classic, aesthetic appeal with technical performance, illustrating the reliability of the movements developed by the Manufacture. This was the first line to benefit from the "1000 hours control" that inspired its name.

# Master Control

*High-performance movement*

The automatic winding movement of this watch operates with a variable-inertia balance wheel that guarantees a stable rate. To ensure enhanced, shock resistance and outstanding reliability, the balance-bridge is fitted with two rests and the balance-spring is laser-welded on either end. The ceramic ball bearings of this movement mean it requires no lubrication.

*Timeless aperture*

The elegant date window illustrates the classically timeless nature of this watch.

*A surprise on the back*

To prolong its visual pleasure, this watch is fitted with a sapphire crystal case-back that reveals the automatic winding movement, driven by a 22-carat gold oscillating weight.

*Jaeger-LeCoultre Calibre 899*

Automatic mechanical movement, 219 parts, 28,800 vibrations per hour, 38-hour power reserve.

**Functions:** hour, minute, seconds, date.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 154 84 20  
Stainless steel/leather

# Master Calendar

*The entire calendar*

The extremely readable and understated dial of this watch displays the hours, minutes, and small seconds, as well as a complete set of calendar indications: day, month, date, and moon phases.

*Finely balanced proportions*

With its elegant 39 mm-diameter case, only 10.6 mm thick, the Master Calendar flatters any wrist.

*Vibrant colours*

The discreet yet distinctive red, crescent-tipped date hand stands out against a midnight blue background that’s studded with sparkling stars that dance after the glowing moon.

*Jaeger-LeCoultre Calibre 866*

Automatic mechanical movement, 305 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, seconds, day, month, date, moon phases.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 155 25 20  
18-carat pink gold/leather

# Master Chronograph

*Pulsometer scale*

Originally designed for doctors and nurses, the pulsometer scale serves to measure their patients' pulses, without any need for calculations.

*The heart of precision*

The movement of this watch is equipped with a column wheel that coordinates the different start, stop, and reset phases of the chronograph function, as well as a vertical coupling-clutch that guarantees optimal reliability of the start/stop function.

*Admirable reserve*

This sturdy and reliable Master Chronograph, with its 40 mm case, is also endowed with a significant 65-hour power reserve.

*Jaeger-LeCoultre Calibre 751A/1*

Automatic mechanical movement, 277 parts, 28,800 vibrations per hour, 65-hour power reserve.

**Functions:** hour, minute, small seconds, date. Chronograph: hour, minute and seconds counters. Pulsometer scale on the inner bezel.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 40 mm diameter.

**Water resistance:** 5 bar.

Ref. 153 84 20  
Stainless steel/leather

# Master Geographic

*Bringing the world to the wrist*

Would you like to glance at the time in New York, Tokyo, or Rio? The second time-zone dial, located at 6 o'clock, automatically moves to the time in the selected city and also takes into account the summer time (DST). It's a horological complication that simplifies life.

*Dynamic shapes*

Complete with variously shaped, useful functions that are arranged around the dial, this watch features a dynamic design that reflects the spirit of keen travellers, passionate about watches. In an additional subtle touch, the city disc opening is shaped like the Jaeger-LeCoultre 'anchor' logo.

*Day or night*

The small day/night indicator specifies whether it is 7 am or 7 pm in the city representing the second time zone.

*Jaeger-LeCoultre Calibre 939A*

Automatic mechanical movement, 310 parts, 28,800 vibrations per hour, 43-hour power reserve.

**Functions:** main time zone: hour, minute, central seconds, date, power reserve, day/night indication. Second time zone: hour, minute, 24-city disc specifying summer time, 24-hour indication.  
**Materials available:** 18-carat pink gold, stainless steel.  
**Strap:** alligator leather.  
**Case:** 39 mm diameter, sapphire crystal case-back.  
**Water resistance:** 5 bar.

Ref. 142 25 21  
18-carat pink gold/leather

# Master Memovox

*Extremely pure sound*

Having made history in 1956 as the first automatic winding alarm watch, the Memovox now offers an extremely pure sound.

*Modern performances*

The technical performances of the watch are reinforced by a large variable-inertia balance wheel, ceramic ball bearings, and a 45-hour power reserve.

*Sleek elegance*

With its pure lines, its dial that creates subtle light effects, and its Alpha hands and hour-markers, the Master Memovox exudes an aura of timeless elegance. The date appears through an aperture at 3 o'clock.

*Jaeger-LeCoultre Calibre 956*

Automatic mechanical movement, 268 parts, 28,800 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, seconds, date, alarm.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 40 mm diameter.

**Water resistance:** 5 bar.

Ref. 141 84 30  
Stainless steel/leather

# Master Tourbillon Dualtime

*A stunning vision*

While alleviating the effects of gravity on the movement, the tourbillon also provides a spectacular sight. To ensure that a fraction of the show is not missed, the date hand, with its two red tips, jumps between the 15<sup>th</sup> and the 16<sup>th</sup> of each month.

*Whirling lightness*

Composed of 71 parts, including a large balance wheel, the tourbillon is a true featherweight at 0.33 grams. Its carriage, with entirely hand-polished angles, is made from an ultra-light grade-5 titanium alloy that helps keep energy consumption to an absolute minimum.

*Second time zone*

The dial displays the reference time in a 24-hour mode, along with the second time zone, to accompany you to the other side of the world.

*Jaeger-LeCoultre Calibre 978B*

Automatic mechanical movement, 302 parts, 28,800 vibrations per hour, 48-hour power reserve.

**Functions:** local hour, minute, 24-hour reference time, tourbillon regulator with seconds indicator, jumping-hand date display.

**Material available:** 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 41.5 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 156 24 21  
18-carat pink gold/leather

## Master Grande Tradition

*The elegance of tradition  
meets technical performance*

The refined aesthetic of the Master Grande Tradition celebrates the undeniable elegance of 19<sup>th</sup>-century pocket watches. With stretched hour-markers, a traditional minute circle, dauphine-type hands, and a finely grained dial, each model pays tribute to the timeless nature of classic, fine watchmaking

design codes, while combining them with the watchmaking skills cultivated by Jaeger-LeCoultre. Sophisticated complications are perfectly staged in these creations, enhanced to perfection by the work of the artisans that exercise their Rare Handcrafts ("Métiers Rares").

# Master Grande Tradition Tourbillon Cylindrique

*The spirit of the tourbillon*

This watch model houses a Jaeger-LeCoultre Manufacture tourbillon at the heart of its dial, comprised of pure, simple lines. Fitted with a cylindrical balance-spring, it considerably reduces the negative effects of gravity on the movement and guarantees reliability.

*An elegant dial*

On the silvered, grained dial that subtly attracts the light, hour-markers that are as slender as pencil lines elegantly extend under the tips of dauphine-type hands.

*Details that count*

To show the tourbillon at its best, the dial is slightly withdrawn into the background, enabling the onlooker to enjoy this majestic watchmaking spectacle to the fullest. On the tourbillon, a small blue arrow that is located on the three-part hand indicates the passing of the seconds.

*Jaeger-LeCoultre Calibre 995*

Automatic mechanical movement, 275 parts, 28,800 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, flying tourbillon.

**Materials available:** 18-carat pink gold, platinum.

**Strap:** alligator leather.

**Case:** 42 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 508 64 20  
Platinum/leather

# Master Grande Tradition Tourbillon Cylindrique à Quantième Perpétuel

*Finesse and harmony*

On the ultra-readable, grained-finish dial, the perpetual calendar functions each find their ideal space within a symmetrically pleasing arrangement. The extremely slim hour-markers form a half-circle that frames the pointer-type, gold-rimmed indicators.

*Head-spinning heart*

The mechanism's prime feature is the flying tourbillon that keeps the movement steadily beating, while turning the heads of all those with a passion for beautiful watches. It is equipped with a cylindrical balance-spring and guarantees excellent timekeeping precision.

*Tribute to Antoine LeCoultre*

Paying homage to the inventive spirit of Antoine LeCoultre, the Manufacture's founder, the movement's 22-carat gold oscillating weight is adorned with an engraving that depicts the medal won at the 1889 Universal Exposition in Paris. It can be admired through the sapphire crystal case-back.

*Jaeger-LeCoultre Calibre 985*

Automatic mechanical movement, 431 parts, 28,800 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, flying tourbillon fitted with a cylindrical spring, seconds indication on the flying tourbillon, perpetual calendar: day, month, date, 4-digit year, moon phases.  
**Materials available:** limited series of 180 pieces in extra-white platinum, 18-carat pink gold.  
**Strap:** alligator leather.  
**Case:** 42 mm diameter, sapphire crystal case-back.  
**Water resistance:** 5 bar.

Ref. 504 25 20  
18-carat pink gold/leather

# Master Grande Tradition à Répétition Minutes

*Grand orchestral sound*

Thanks to its crystal gongs, with their heels firmly welded to the crystal, along with its trebuchet hammers, the rich melody of the minute repeater rings with outstanding intensity. The impeccably regular, long-lasting notes are an auditory delight. To ensure the wearer’s peace of mind, a safety device on the pushbutton avoids having to press it again while the minute repeater is in action. Thus, it prevents any damage to the mechanism.

*Automatically surprising*

To enhance user friendliness, this watch is driven by an automatic movement. Its gold oscillating weight may be admired through the sapphire crystal on the back of the case.

*Pristine beauty*

Subtly raised hour-markers stretch like tiny batons on the finely grained dial that softly catches the light, while the small seconds appear at 6 o’clock on an opaline dial that plays with sunbeams. The minute repeater pushbutton elegantly merges with the satin-finish case, which is modestly sized to fit even the slimmest wrist.

*Jaeger-LeCoultre Calibre 942*

Automatic mechanical movement, 437 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, small seconds, minute repeater.

**Material available:** 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 509 25 20  
18-carat pink gold/leather

# Master Grande Tradition à Quantième Perpétuel 8 jours SQ

*Perpetual functions*

Symmetrically arranged around the dial, the perpetual calendar functions harmoniously match one another with their skeleton indicators at 3, 6, and 9 o'clock. A day/night indicator and an aperture for the power reserve, which has a duration of 8 days, appear at 12 o'clock.

*The sheer beauty of skeletonisation*

Jaeger-LeCoultre's artisan practitioner of Rare Handcrafts ("Métiers Rares") has entirely skeletonised and decorated the movement by hand, revealing the mechanism and only leaving room for the essentials. The material is cut away with a tiny saw, and then the surfaces are individually drawn out, bevelled, polished, chased, and engraved by hand.

*Enamelled perimeter*

With a delicate guilloché pattern, the dial's perimeter is coated with a deep green Grand Feu enamel that elegantly matches the grey geartrains and indications.

*Jaeger-LeCoultre Calibre 876SQ*

Manually wound mechanical movement, 262 parts, 28,800 vibrations per hour, 8-day power reserve.

**Functions:** hour, minute, perpetual calendar: day, month, date, 4-figure year, moon phases, day/night indicator.  
**Material available:** limited series of 200 pieces in 18-carat white gold.  
**Strap:** alligator leather.  
**Case:** 42 mm diameter, sapphire crystal case-back.  
**Water resistance:** 5 bar.

Ref. 506 35 40  
18-carat white gold/leather

# Master Grande Tradition Tourbillon Céleste

*Stellar tourbillon*

As if floating weightlessly in a star-studded night sky, the celestial tourbillon guarantees the reliability of the movement and takes a full day to turn around the dial, thereby presenting a different face each time one looks at the watch.

*Map of the stars*

Immersed in the sky map of the Northern hemisphere, the eye naturally seeks to identify familiar constellations on the dial, such as the Big Dipper. Is the day placed under the sign of Taurus or Capricorn? A golden sun moves around the outer rim and indicates the day of the month, as well as the corresponding zodiac sign.

*Precious corona*

Like a halo of precious light that surrounds the heavenly vision, the inner bezel ring is adorned with brilliant-cut diamonds, whose sparkle is further enhanced by baguette-cut diamonds that entirely cover the bezel, lugs, and crown.

*Jaeger-LeCoultre Calibre 946*

Manually wound mechanical movement, 334 parts, 28,800 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, flying tourbillon, celestial map, signs of the zodiac, month, 24-hour indication.

**Material available:** 18-carat white gold.

**Gem-setting:** 174 diamonds, approx. 5.4 carats. F-G, VVS diamonds.

**Strap:** alligator leather.

**Case:** 42 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 507 34 01  
Gem-set 18-carat white gold/leather

# Master Grande Tradition Tourbillon Céleste

*Surprising tourbillon*

The orbital tourbillon, which guarantees the movement’s reliability, reserves a surprise for each gaze at the watch. As though floating weightlessly, it accompanies the movement around the dial, as it completes a revolution every day.

*Precious contrasts*

Like a sculpture, the watch’s dial is made up of geometric motifs in mother-of-pearl and aventurine. A mosaic of contrasts between light and dark tones gives the watch a unique character for a fine watchmaking timepiece.

*Setting in light*

To enhance the decoration of the dial, the master jeweller has set the perimeter, bezel, and crown with baguette-cut diamonds. The lugs are also set with diamonds that create a captivating effect of light.

*Jaeger-LeCoultre Calibre 946*

Manually wound mechanical movement, 334 parts, 28,800 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, flying tourbillon.

**Material available:** limited series of 8 pieces in 18-carat white gold.

**Gem-setting:** 213 diamonds, approx. 13.44 carats. F-G, VVS diamonds.

**Strap:** alligator leather.

**Case:** 42 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 507 34 03  
18-carat white gold/leather

## Rendez-Vous

*A graceful world brimming with delicate nuances*

Precious, sophisticated, and so delightfully feminine with its rounded curves, the Rendez-Vous collection does not reveal all its mysteries at first glance. One needs to take a closer look to discover all its treasures: its automatic movement, whose intricate complexities are revealed through the sapphire crystal case-back; the delicacy of its finishing and of its dial, featuring a fine guilloché motif or adorned with mother-of-pearl; and the radiance of its precious stones.

Graceful from every angle, this collection embodies an ideal blend of aesthetic and mechanical excellence. It is an anthem to beauty that flatters feminine wrists by night and day.

### *When women are looking for complications*

Contrary to certain preconceived ideas, the first wristwatches were worn by women. Always ahead of its time, Jaeger-LeCoultre was one of the first to offer women elegant time-pieces entirely set with diamonds and fitted with exceptionally small calibres. The Rendez-Vous collection pays tribute to this tradition by offering them the horological complications they now desire.

Dreams are everywhere in these mesmerisingly beautiful and romantic complications. Witness the moon phases set against a star-studded background, the tourbillon delivering a performance that one never gets tired of admiring, or the crystal-clear chimes of the minute repeater surrounded by precious ivy foliage. The expertise of the artisans, exercising their skills within the Grande Maison, is majestically showcased through this collection, where no detail is left to chance.

# Rendez-Vous Night & Day

*10 pm or 10 am?*  
The sun and moon rotate past a 6 o'clock indicator that shows whether the time displayed is a day or night-time hour.

*A touch of sophistication (gem-set version)*  
The entirely guilloché dial is enhanced by a bezel that's set with brilliant-cut diamonds, radiantly highlighting the watch's daintiness.

*Shimmering dial (non gem-set version)*  
Like a secret drawn from the hollow of a shell, mother-of-pearl reveals its delicately iridescent shimmer when exposed to the light. It magnificently embellishes the beauty of this watch, forming a perfect backdrop for the diamonds that dot the hour-markers in a subtle evocation of quintessential femininity. Complementing this magnificent expression of gentle elegance on the wrist, the bezel of the watch forms a concave shape composed of soft, feather-light curves.

*Jaeger-LeCoultre Calibre 967A*  
Automatic mechanical movement, 203 parts, 28,800 vibrations per hour, 42-hour power reserve.

**Functions:** hour, minute, central seconds, day/night indicator.  
**Materials available:** gem-set version: 18-carat pink gold, stainless steel. Non gem-set version: 18-carat pink gold, stainless steel.  
**Gem-setting:** gem-set version: 60 diamonds, approx. 0.42 carats. Non gem-set version: 11 diamonds, approx. 0.02 carats. F-G, VVS diamonds.  
**Strap/Bracelet:** gem-set version: alligator leather, 18-carat pink gold, stainless steel. Non gem-set version: alligator leather, stainless steel.  
**Case:** 29 mm diameter, sapphire crystal case-back.  
**Water resistance:** 3 bar.

18-carat pink gold/leather

# Rendez-Vous Night & Day

*Precious face*

The brilliant-cut diamonds that adorn the crown are a sparkling echo of the radiant sunburst, satin-brushed dial.

*Stellar dance*

The moon and sun at 6 o'clock perform a graceful choreography in the day/night indicator. Its powdered, silver-toned finish elegantly matches the iconic numerals of the Rendez-Vous collection.

*Jaeger-LeCoultre Calibre 898A*

Automatic mechanical movement, 204 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, central seconds, day/night indicator.

**Materials available:** 18-carat pink gold, stainless steel.

**Gem-setting:** 60 diamonds, approx. 0.69 carats. F-G, VVS diamonds.

**Strap:** alligator leather.

**Case:** 34 mm diameter, sapphire crystal case-back.

**Water resistance:** 3 bar.

Ref. 344 84 60  
Gem-set stainless steel/leather

Ref. 344 24 50  
Gem-set 18-carat pink gold/leather

# Rendez-Vous Night & Day

*Glittering diamond and mother-of-pearl reflections*  
Immersed in a mother-of-pearl ocean, the centre and rim of the dial are magnified by brilliant-cut diamonds. Adding a further touch of sophistication, the lugs and sides of the case are also decked out in these precious stones that eloquently speak to a woman's heart.

*Heavenly signs of the times*  
An indicator at 6 o'clock displays the alternation of sun and moon, as they show the wearer whether it is 10 am or 10 pm.

*Generous size*  
Framing an elegant round dial, this watch radiates a sophisticated and feminine presence on the wrist.

*Jaeger-LeCoultre Calibre 898A*  
Automatic mechanical movement, 204 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, seconds, day/night indicator.  
**Materials available:** 18-carat white gold, 18-carat pink gold.  
**Gem-setting:** model in 18-carat white gold: 191 brilliant-cut diamonds, approx. 1.42 carats; model in 18-carat pink gold: 175 brilliant-cut diamonds, approx. 1.33 carats. F-G, VVS diamonds.  
**Straps:** satin, alligator leather.  
**Case:** 36 mm diameter, sapphire case-back.  
**Water resistance:** 3 bar.

Ref. 343 24 90  
Gem-set 18-carat pink gold/leather

# Rendez-Vous Date

*Delightfully rounded date*

The date appears through a gracefully rounded 6 o'clock dial aperture that echoes the aesthetic of the Rendez-Vous line.

*Shimmering refinement*

The shimmer of mother-of-pearl instils the dial with a sense of gentle delicacy, while diamonds mark the hours, and lend a discreet and refined touch.

*Curvaceous design*

The pleasingly soft concave shape of the bezel accentuates the feminine spirit of this model.

*Jaeger-LeCoultre Calibre 899*

Automatic mechanical movement, 219 parts, 28,800 vibrations per hour, 38-hour power reserve.

**Functions:** hour, minute, seconds, date.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 37.5 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 354 84 90  
Stainless steel/leather

# Rendez-Vous Date

*Feminine figure*

The smallest model in the Rendez-Vous line, this watch exudes a discreet and dainty charm on the wrist with its 27.5 mm diameter.

*Jaeger-LeCoultre miniature marvel*

Drawing upon Jaeger-LeCoultre’s remarkable expertise in the miniaturisation of its calibres, and to match its dainty proportions, the Rendez-Vous Date watch houses one of the smallest automatic movements, Calibre 966, from the Jaeger-LeCoultre Manufacture.

*A sparkling showcase for the date*

A diamond-set bezel magnifies the dial’s beauty, which reveals the date through an aperture at 6 o’clock.

*Jaeger-LeCoultre Calibre 966*

Automatic mechanical movement, 214 parts, 28,800 vibrations per hour, 42-hour power reserve.

- Functions: hour, minute, central seconds, date.
- Material available: 18-carat pink gold.
- Gem-setting: 60 diamonds, approx. 0.42 carats. F-G, VVS diamonds.
- Strap/Bracelet: alligator leather, 18-carat pink gold.
- Case: 27.5 mm diameter, sapphire crystal case-back.
- Water resistance: 3 bar.

18-carat pink gold

# Rendez-Vous Ivy

*Art imitates plant-life in shimmering mother-of-pearl*

As if gently stirred by the breeze, the ivy leaves appear to rustle beneath the mother-of-pearl. The emblematic floral numerals of the Rendez-Vous collection gracefully unfurl on this dainty face.

*Luminous gem-setting*

The purity of sparkling diamonds is harmoniously matched by the delicate charm of mother-of-pearl.

*Automatic movement*

Its 34 mm diameter houses an automatic movement that ensures peace of mind and pleasing proportions.

*Jaeger-LeCoultre Calibre 898C*

Automatic mechanical movement, 195 parts, 28,800 vibrations per hour, 43-hour power reserve.

**Functions:** hour, minute.

**Material available:** 18-carat white gold.

**Gem-setting:** 380 diamonds, approx. 1.05 carats. F-G, VVS diamonds.

**Strap:** alligator leather.

**Case:** 34 mm diameter, sapphire crystal case-back.

**Water resistance:** 3 bar.

Ref. 356 34 30  
Gem-set 18-carat white gold/leather

# Rendez-Vous Celestial

*A celestial vision of time*

An enchanting lapis lazuli disc bears the signs of the zodiac and constellations of the Northern hemisphere, almost imperceptibly driven by the automatic movement as the year goes by. The blue dial, with its guilloché finish, echoes the immensity of the universe.

*Star-studded gem-setting*

Like sparkling stars that mark the boundaries of space, brilliant-cut diamonds adorn the bezel, lugs, sides of the case, and upper part of the dial. In precious detail, the two crowns are set with inverted diamonds.

*Shooting star*

Activated by one of the crowns, a poetic and mysterious shooting star moves around the dial to mark an important moment in your day as you set your very own rendezvous with the stars.

*Jaeger-LeCoultre Calibre 809/1*

Automatic mechanical movement, 238 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, sky chart, celestial disc, signs of the zodiac, hand for indicating the time of an appointment.

**Material available:** 18-carat white gold.

**Gem-setting:** 155 brilliant-cut diamonds, approx. 2.09 carats. F-G, VVS diamonds.

**Strap:** alligator leather.

**Case:** 37.5 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 348 35 90  
Gem-set 18-carat white gold/leather

# Rendez-Vous Moon

*Radiant beauty*  
Fire is merged with light in the pink gold case and the purple-red aventurine dial that represent the Northern hemisphere constellations. The case and dial are both embellished by the diamonds’ brilliance.

*The moon in all its majesty*  
A majestic, mother-of-pearl moon slowly progresses in the middle of the heavenly vault. It reflects the gentle brilliance of the top of the dial, that is adorned with the same material as the backdrop of the elegant, applique numerals. At the tip of a hand, a mysterious star indicates the time of a future rendezvous.

*Jaeger-LeCoultre Calibre 935*  
Automatic mechanical movement, 265 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, moon phases, hand for indicating the time of an appointment.  
**Material available:** 18-carat pink gold.  
**Gem-setting:** 190 diamonds, approx. 2.5 carats. F-G, VVS diamonds.  
**Strap:** alligator leather.  
**Case:** 39 mm diameter, sapphire crystal case-back.  
**Water resistance:** 5 bar.

Ref. 353 24 90  
Gem-set 18-carat pink gold/leather

# Rendez-Vous Moon

*Mother-of-pearl*

Full of mystery and clad in mother-of-pearl, the moon is revealed in a wide display at 6 o'clock. In the centre of a starry sky, it transmits the most delicate reflections, to the delight of romantic dreamers everywhere.

*Ivy reaches for the stars*

Like a midsummer night sky, the Grand Feu enamel dial reveals thousands of stars. The master enameller has scattered minuscule chips of silver throughout the surface to create this heavenly impression. Hand-painted ivy leaves creep into the sky, like a symbol of eternal love.

*Brilliance of the stars*

Evoking the shining stars above, the bezel, lugs, and case's crown are set with brilliant-cut diamonds. A star that can slide around the dial, adjustable via one of the watch's crowns, indicates the time of your next rendezvous.

*Jaeger-LeCoultre Calibre 935*

Automatic mechanical movement, 265 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, moon phases, hand for indicating the time of an appointment.

**Material available:** 18-carat white gold.

**Gem-setting:** 124 diamonds, approx. 2.63 carats. F-G, VVS diamonds.

**Strap:** satin.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 353 34 E1  
Gem-set 18-carat white gold/satin

# Rendez-Vous Tourbillon

*A tourbillon in the plant world*

One’s gaze is constantly drawn to the tourbillon, intrigued by its irresistible rotations. The uninterrupted rotations of the tourbillon neutralise the harmful effects of gravity on the movement. A row of diamonds forms a delicate crown and highlights the opening of a watchmaking spectacle.

*Majestic ivy*

The ivy motif seems to spring from the tourbillon and scroll out over the dial. A classic guilloché covers the surface, while a plant-effect guilloché recreates the veins of the plant. To further enhance the complication, the elegant, contemporary, plum-coloured hue and organic lacework are adorned with translucent enamel.

*A diamond adornment*

The setting’s radiance on the bezel, horns, and crown serves to further accent the deep colour of the watch. A portion of the bracelet buckle and the middle of the band are also set with diamonds to add to the piece’s sophistication.

*Jaeger-LeCoultre Calibre 978*

Automatic mechanical movement, 302 parts, 28,800 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, seconds, tourbillon.

**Material available:** 18-carat white gold.

**Gem-setting:** 211 diamonds, approx. 2.77 carats. F-G, VVS diamonds.

**Strap:** satin.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 341 34 E3  
Gem-set 18-carat white gold/satin

# Rendez-Vous Minute Repeater

*Melodious chimes*

When the minute repeater starts to strike, time stands still and sound delights the ear. The watchmaking artisans at Jaeger-LeCoultre have developed a chime that produces a rich and intense auditory experience, thanks to the trebuchet hammers striking crystal gongs welded to the sapphire crystal.

*Delicate foliage*

A universal symbol of faithfulness, ivy weaves its way across the dial, entwining the numerals with its diamond-set leaves. Jaeger-LeCoultre’s distinctive snow-setting technique ensures that gems of various sizes are perfectly nested in order to form this precious foliage. Rows of diamonds magnify the entire case, with 550 ageless stones.

*Subtle shades*

This exquisitely graceful ivy twines across an enamelled dial that is patiently crafted by a master enameller. On a white gold dial, adorned with a sunburst guilloché motif, the artisan uses a brush to delicately apply blue pigment that gives the watch its inimitable shimmer, creating a fascinating moiré effect.

*Jaeger-LeCoultre Calibre 942*

Automatic mechanical movement, 437 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, small seconds, minute repeater.

**Material available:** limited series of 88 pieces in 18-carat white gold.

**Gem-setting:** 550 diamonds, approx. 2.3 carats. F-G, VVS diamonds.

**Strap:** satin.

**Case:** 39 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 350 34 E1  
Gem-set 18-carat white gold/satin

# Rendez-Vous Secret

*Diamonds in all their majesty*

Sparkling like the crystals that make a snowflake, a circle of brilliant, baguette, and marquise-cut diamonds give their exquisite beauty to the cover of this Rendez-Vous Secret watch. Two rows of diamonds adorn its bracelet, which graces the slenderest of wrists.

*When ivy meets mother-of-pearl*

Leaves of ivy subtly shimmer against the mother-of-pearl and bring the dial to life with their iridescent reflections, while time is measured by the delicate numerals that are emblematic of the Rendez-Vous line.

*Shhhh, it’s a secret...*

Like a hushed whisper, whose secret is only blushingly revealed, the watch’s cover slightly opens to give a glimpse of the time that appears on its dial. The time is immediately forgotten, given the beauty of its case.

*Jaeger-LeCoultre Calibre 846/1*

Manually wound mechanical movement, 93 parts, 21,600 vibrations per hour, 38-hour power reserve.

- Functions: hour, minute.
- Material available: 18-carat white gold.
- Gem-setting: 304 diamonds, approx. 11.9 carats. F-G, VVS diamonds.
- Bracelet: gem-set 18-carat white gold.
- Case: 24 mm diameter.
- Water resistance: 3 bar.

Gem-set 18-carat white gold/gem-set  
18-carat white gold

# Geophysic

*Character, personality, richly suprising horological content.  
A legend lives on.*

The Geophysic Collection conveys a great deal without making a show of it. Subtly and unostentatiously, the models stand out and appeal to those who take an interest. Their name belongs as much to the world's history as to Jaeger-LeCoultre's own heritage. A legendary chronometer created in 1958, within the framework of the International Geophysical Year, it brims with exploration and scientific discoveries. The Grande Maison gives a new lease on life to the Geophysic through a line of models combining aesthetic appeal, technical sophistication, and user-friendliness.

*The complexity of a fine watchmaking  
calibre behind the stunning simplicity of use*

The Geophysic, in its different versions, proves itself both resolutely contemporary and classic. Playing with paradoxes, it combines the complexity of an automatic, fine watchmaking calibre with great simplicity of use, to the delight of those who choose it. The Geophysic Universal Time and the Geophysic True Second models are both equipped with the True Second complication, stemming from an extremely sophisticated construction. This device involves a seconds hand that jumps once per second, contrary to standard mechanical movements, and does so without disturbing the rate of the watch. These models are also equipped with the Gyrolab, an atypical balance wheel whose non-circular configuration reduces air friction. It's a decisive breakthrough in terms of the watch's precision.

# Geophysic 1958

## *A design nod to 1958*

In tribute to the original model, this watch features a slightly broader 38.5 mm diameter to ensure enhanced comfort and greater readability. Its pure lines and perfect symmetry combine to create a timeless style.

## *Off-road calibre*

Loyal to the spirit of the scientific expeditions that have made their mark on history, such as the submarine North Pole crossing, the watch is equipped with the Jaeger-LeCoultre Calibre 898/1, which is considered to be one of the most accurate and reliable automatic watch movements.

## *High precision*

The Geophysic 1958 is legendary and yet unmistakably contemporary, with a stop-seconds function that ensures more accurate time-setting, 28,800 vibrations per hour, a guarantee of high precision, and a balance wheel with micrometric adjustment.

## *Jaeger-LeCoultre Calibre 898/1*

Automatic mechanical movement, 201 parts, 28,800 vibrations per hour, 43-hour power reserve.

**Functions:** hour, minute, central seconds hand.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 38.5 mm diameter.

**Water resistance:** 10 bar.

Ref. 800 85 20  
Stainless steel/leather

# Geophysic True Second

*Not so very classical*

Drawing inspiration from the original Geophysic watch, this version features a simple aesthetic whose charm lies in the details. Luminescent dots top the hour-markers on the inner bezel ring, echoing the hands that also glow in the dark. The sapphire crystal case-back provides a chance to admire the movement’s Côtes de Genève finishes.

*‘Speed dating’*

The date appears in an elegant window at 3 o’clock. The single crown serves to wind the movement, adjust the hours and minutes simultaneously, adjust the hours independently of the minutes, and thus, reset the correct date more rapidly.

*Every second counts*

The surprisingly accurate large hand on the dial actually stops with each elapsed second. This True Second hand offers an exact reading of time and represents an authentic complication for a mechanical movement. An aerodynamic balance wheel contributes to the excellent reliability of this mechanism.

*Jaeger-LeCoultre Calibre 770*

Automatic mechanical movement, 270 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, True Second, date.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 39.6 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 801 25 20  
18-carat pink gold/leather

# Geophysic Universal Time

*The world within reach*

At the centre of the map lies the North Pole, a tribute to the USS Nautilus expedition beneath the ice cap that took place during the International Geophysical Year in 1958. In exploring the lacquered oceans and engraved finishes, the wearer of this model feels as though his journey has already begun.

*Time for travel*

The traveller starts ticking to the time in Paris or New York with one simple adjustment. The single crown serves to move the worldtime disc in one smooth move, as well as set the hours independently of the minutes. A surefire means of making cross-continental travel twice as pleasurable.

*To the nearest second*

The hand literally marks off each second of elapsed time. The True Second is a complication that enables an accurate reading of the time at each given moment, and reveals the sophistication of the movement driving the watch.

*Jaeger-LeCoultre Calibre 772*

Automatic mechanical movement, 271 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute, True Second, worldtime.

**Materials available:** 18-carat pink gold, stainless steel.

**Strap:** alligator leather.

**Case:** 41.6 mm diameter.

**Water resistance:** 5 bar.

Ref. 810 84 20  
Stainless steel/leather

# Duomètre

*A revolutionary horological concept behind a refined and restrained aesthetic*

Inspired by the dream of pushing watchmaking boundaries, the Dual-Wing concept invented by Jaeger-LeCoultre is twice as revolutionary. Two independent mechanisms, united by a single regulating organ, ensure the peerless performance and precision of the Duomètre collection. The first of these mechanisms is dedicated to the smooth running of the complications, while the second governs the precision of time measurement. The cohabitation between these two parts that compose the Dual-Wing movement earns the Duomètre collection a place of its own within the world of complication watches.

### *The aesthetic refinement of 19<sup>th</sup>-century models*

A multitude of high-precision techniques are used to hand-decorate the movements of each watch. For example, the “côtes soleillées” motif is a technique developed by Jaeger-LeCoultre, which adorns the metal with a pattern similar to that of a sunbeam. The exceptional attention devoted to finishing ensures the smooth interaction of all parts of the watch.

The dial, the first element visible to the naked eye, reflects the wealth of this model. The subtly grained face plays with alternating light and shade effects that accentuate its symmetry and further facilitate the reading of its functions. The case of each model highlights the harmony between the polished lugs and the satin-brushed case middle. These watches are as pleasing to look at as they are to wear.

# Duomètre Quantième Lunaire

*The moon in all its majesty*

On the left side of the silvered, opaline dial, the lunar calendar function is displayed under the domed sapphire crystal. The hand-hammered moon phase indicator gracefully evolves in a sky delicately sprinkled with stars. To the right of this scene, the hours counter blends seamlessly with the extreme elegance of the traditional hour-markers.

*The Dual-Wing system*

The case houses two independent mechanisms: one dedicated to the functions and the other to operating the watch’s regulating organ. They each have their own source of energy, which guarantees maximum timekeeping accuracy.

*Opening up the movement*

At 6 o’clock, the ‘jumping seconds’ counter is surrounded on either side by the decorated movement, which can be admired through two simple and discreet apertures. On either side of the bright red rubies, the geartrains, bridges, and bottom plate come into focus as onlookers further discover the watch.

*Jaeger-LeCoultre Calibre 381*

Manually wound mechanical movement, 374 parts, 21,600 vibrations per hour, 2 independent barrels each with a 50-hour power reserve.

**Functions:** hour, minute, central seconds, jumping seconds, date, moon phases, power reserve for the regulating organ, power reserve for the functions.

**Material available:** 18-carat white gold.

**Strap:** alligator leather.

**Case:** 40.5 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 604 34 20  
18-carat white gold/leather

# Duomètre Unique Travel Time

*Second time zone*

This watch crosses continents with its wearer. Placed opposite the reference time at 2 o'clock is a second time-zone indicator adjustable to the nearest minute. A hand displays the minutes, while the hours appear through an aperture.

*A map of the world on your wrist*

The delightfully rounded and colourful globe at 6 o'clock displays the world's 24 time zones, while a discreet day/night indicator enables the wearer to track this useful temporal reference. It's a stunning sight appearing against the backdrop of a delicately grained dial.

*A surprise on the other side*

Like another stage in the discovery of this watch, the back brings a different set of surprises. Its circumference is engraved with the names of the cities corresponding to the 24 time zones, while a sapphire crystal reveals the watch movement that features the Dual-Wing concept.

*Jaeger-LeCoultre Calibre 383*

Manually wound mechanical movement, 498 parts, 28,800 vibrations per hour, 2 independent barrels each with a 50-hour power reserve.

**Functions:** reference time: hour, minute, central seconds. 2<sup>nd</sup> time zone: digital jumping hour display, minute, worldtime. World map, day/night indicator.

**Material available:** 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 42 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 606 25 20  
18-carat pink gold/leather

# Duomètre Chronographe

*Two wings*

Like a bird adjusting its flight using both wings, the Dual-Wing concept is composed of two independent watch mechanisms. One transmits its force to the regulating organ, while the other drives the chronograph functions.

*Jumping seconds*

Tirelessly staging a lively show at 6 o'clock, the jumping seconds hand performs one full turn per second and indicates a sixth of a second.

*A dial hinting at what lies below*

As if to reveal something of its inner mysteries, the dial is openworked at 5 and 7 o'clock, thus, allowing glimpses of a stunningly beautiful, finely decorated watch movement, on which the nickel silver bridges and mainplate reflect the light for a delightful effect.

*Jaeger-LeCoultre Calibre 380A*

Manually wound mechanical movement, 445 parts, 21,600 vibrations per hour, 2 independent barrels each with a 50-hour power reserve.

**Functions:** hour, minute, central seconds, power reserve. Chronograph: concentric hour and minute, seconds, jumping seconds, chronograph power reserve.

**Material available:** 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 42 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 601 25 21  
18-carat pink gold/leather

## Master Extreme

*Technical and inventive watches for world explorers*

In the beginning was adventure, with a desire to discover, to cross over, to reach... The Jaeger-LeCoultre Manufacture, born in the Vallée de Joux in a remote area of the Swiss Jura, has been imbued since its origins with a determination to transcend frontiers. The harsh living conditions and the isolation of the region has led its inhabitants to display daring tenacity, and innovation. These qualities continue to pervade the identity of our Brand, and particularly the Master Extreme collection, whose perfectly designed functions, ergonomic proportions, innovative materials, and a unique compression key system ensure optimal water resistance on all Master Compressor models. From the highest peaks to the depths of the ocean, this range accompanies the pioneers of adventure.

*Diving watches equally at home under the water  
as in the city*

In 1959, the Manufacture made a noteworthy entrance into the field of diving watches by creating the Memovox Deep Sea, the first automatic diving watch equipped with an alarm designed to remind divers that it was time to begin the return to the surface. Since then, the Grande Maison has perpetuated the Jaeger-LeCoultre Deep Sea collection through models inspired by the original characteristics that feature a blend of technical performance and elegance suited for daily wear. These timepieces look just as good over a diving suit as they do with a business suit or weekend gear.

# Jaeger-LeCoultre Deep Sea Chronograph

*Black and white chronograph*

This watch displays the chronograph functions on three hours, minutes and seconds counters, harmoniously framed by the track-type dial rim and graduated bezel.

*Onboard instrument*

The chronograph operating indicator is inspired by the Chronoflight, a 1930s civilian and military aviation onboard instrument. It enables the diver to see at a glance whether the chronograph is ready for use (white), in operation (white/red) or stopped (red).

*Woven strap*

The watch strap is made of calfskin that is mineral-tanned to guarantee its resistance and its waterproofness, both indispensable qualities in a diver’s watch.

*Jaeger-LeCoultre Calibre 758*

Automatic mechanical movement, 340 parts, 28,800 vibrations per hour, 65-hour power reserve.

**Functions:** hour, minute, small seconds. Chronograph: hour, minute and central seconds counters. Chronograph status indicator. Diving bezel.  
**Material available:** stainless steel.  
**Strap:** leather.  
**Case:** 42 mm diameter.  
**Water resistance:** 10 bar. Diving watch.

Ref. 206 85 70  
Stainless steel/leather

# Jaeger-LeCoultre Deep Sea Chronograph

*Highly resistant case*

Composed of reinforced cermet, an aluminium and ceramic particle composite material that is coated with a protective ceramic layer, the case of this watch is light, resistant, and imperishable.

*Diver’s chronograph*

The watch displays the chronograph hour, minute, and seconds indications on three counters, along with a highly readable operating indicator placed just above the central hands, which proves extremely useful while diving.

*A glance is enough*

The rotating bezel has been slimmed down to ensure optimal readability of the timekeeping and chronograph indications, which are indispensable to divers.

*Jaeger-LeCoultre Calibre 758*

Automatic mechanical movement, 340 parts, 28,800 vibrations per hour, 65-hour power reserve.

**Functions:** hour, minute, small seconds. Chronograph: hour, minute and central seconds counters. Chronograph status indicator. Diving bezel.

**Material available:** reinforced cermet.

**Strap:** technical fabric.

**Case:** 44 mm diameter.

**Water resistance:** 10 bar. Diving watch.

Ref. 208 A5 70  
Reinforced cermet/technical fabric

# Master Compressor Chronograph Ceramic

*Useful functions for the adventurous*

Among the indicators at the centre of the dial, the model offers the chronograph function, together with a day/night indicator that accompanies the second time zone that is indicated by a grey openworked hand. The date can be read in an aperture at 5 o'clock. A compression key, patented by Jaeger-LeCoultre, guarantees the chronograph the maximum level of water resistance.

*Ceramic case*

A material that is both lightweight and extremely strong, ceramic gives the model a matte, sporty look. With a 46 mm-diameter case, the watch graces the wearer's wrist with its presence.

*Sporty aesthetic*

The model's technical capacities are reflected in a dial that combines elegant grey and white tones with a vivid blue, which reinforces the watch's sporting vocation. The luminescent hour-markers are very easy to read in the dark.

*Jaeger-LeCoultre Calibre 757*

Automatic mechanical movement, 300 parts, 28,800 vibrations per hour, 65-hour power reserve.

**Functions:** hour, minute, date. Chronograph: hour, minute and central seconds counters. Chronograph function indicator. Hour and minute of 2<sup>nd</sup> time zone. Day/night indicator.

**Material available:** ceramic.

**Strap:** leather.

**Case:** 46 mm diameter.

**Water resistance:** 10 bar. Diving watch.

Ref. 205 C5 71  
Ceramic/leather

# Master Compressor Chronograph 2

*Powerful yet refined*

This watch, with its technical design and facettted hands, is resolutely sporty thanks to its automatic winding chronograph movement.

*Submarine-style water-resistance*

A half-turn of its compressor key crown is enough to hermetically seal the water-resistance system like a submarine hatch.

*Speed on the wrist*

The tachometer scale, appearing on the graduated inner bezel surrounding the dial, serves to measure the average speed of travel between two locations.

*Quick-change straps*

Whether the wearer prefers a leather or rubber strap, or a metal bracelet, all it takes is the two push-pieces on the back of the case to release the strap and fit another one.

*Jaeger-LeCoultre Calibre 751F*

Automatic mechanical movement, 277 parts, 28,800 vibrations per hour, 65-hour power reserve.

**Functions:** hour, minute, small seconds, date. Chronograph: hour, minute and seconds counters. Tachometer scale on the inner bezel, luminescent numerals and hour-markers.  
**Materials available:** 18-carat pink gold, stainless steel.  
**Strap/Bracelet:** alligator leather, stainless steel. Available accessory: rubber strap.  
**Case:** 41.5 mm diameter, interchangeable wristband system integrated within the case.  
**Water resistance:** 10 bar, compression key at 3 o'clock, compression push-pieces at 2 and 4 o'clock.

Ref. 175 84 21  
Stainless steel/leather

# Master Compressor Extreme LAB 2

*Inventiveness rules*

A loyal companion on any adventure, this watch is equipped with a crown-integrated function selector, a digital counter to indicate the chronograph jumping minutes, a manual stop-seconds device, a circular power-reserve, and a second time zone enabling at-a-glance readings.

*Staunch resistance*

The remarkably robust case is made from a light and extremely sturdy TiVan 15 titanium alloy, while the dial is framed by an ultra-resistant ceramic bezel.

*User comfort*

The double pin buckle features a length adjustment design that ensures a perfect fit on the wrist.

*Jaeger-LeCoultre Calibre 780*

Automatic mechanical movement, 569 parts, 28,800 vibrations per hour, 60-hour power reserve. Oscillating weight with platinum segment held by 3 arms.

**Functions:** hour, minute, date, 2<sup>nd</sup> time zone. Chronograph: hour, digital jumping minute counter, seconds. Radial power-reserve, functions selector.

**Materials available:** limited series of 300 in titanium (TiVan 15), titanium (TiVan 15) and ceramic, limited series of 200 in 18-carat pink gold.

**Straps:** double alligator leather and rubber.

**Case:** 46.8 mm diameter, interchangeable wristband system integrated within the case.

**Water resistance:** 10 bar.

Ref. 203 T5 41  
Titanium and ceramic/leather

# Hybris Mechanica

*The peak of fine watchmaking*

The Hybris Mechanica models are born from the philosophy of pushing horological boundaries. Faithfully perpetuating the inventive spirit of Antoine LeCoultre, this collection is a testament to the passion and expertise of the Grand Maison's artisans.

It is born of a desire to give carte blanche to the Jaeger-LeCoultre watchmakers and to release them from existing technical limitations.

All issued in limited series, the watches of the Hybris Mechanica collection are truly unique. They stem from several years of research and development, while featuring an unprecedented association with cutting-edge horological complications, each of which epitomises the Jaeger-LeCoultre expertise and identity.

### *Majestic complications*

Each year, the Hybris Mechanica collection is enriched with a new creation that's inspired by the Jaeger-LeCoultre collections. Thus, the Hybris Mechanica models represent the very essence of our Brand.

Each single watch of this iconic collection has its own story and soul. They feature pairings of sophisticated complications such as the Grande Sonnerie and the tourbillon, the Gyrotourbillon and the chronograph, the Sphérotourbillon and the Dual-Wing system. It's more than enough to enchant passionate watchmaking devotees, as well as all those who love exceptional objects.

# Reverso Tribute Gyrotourbillon

*A sophisticated face*

The elegant face on the front of the watch is an expression of watchmaking sophistication down to the very last detail. The blued dauphine hands elegantly stand out on the grained white dial, while a day/night indicator is subtly housed at 11 o'clock. The dial is adorned with a sunburst guilloché decoration that echoes the finish of the watch's horns.

*Mysterious Gyrotourbillon*

The tourbillon performs its rotations, as though mysteriously suspended in the air, with an exterior traction that enables it to break away from the traditional “tourbillon bridge”. This way, the view of the magnificent watchmaking spectacle is unobstructed. The tourbillon counteracts the harmful effects of gravity on the movement and guarantees optimum precision.

*Showcasing Rare Handcrafts (“Métiers Rares”)*

All of Jaeger-LeCoultre's expertise in Rare Handcrafts (“Métiers Rares”) is unveiled on the back of the watch. The combination of an entirely skeletonised movement and bridges, hand-decorated by craftsmen, gives a remarkable face to the dial. Exemplary watchmaking features are on display: a second time zone, a day/night indicator at 2 o'clock, and a small seconds hand at the Gyrotourbillon.

*Jaeger-LeCoultre Calibre 179*

Manually wound mechanical movement, 385 parts, 21,600 vibrations per hour, 38-hour power reserve.

**Functions:** front: hour, minute, Gyrotourbillon, seconds, day/night indicator; back: hour and minute of 2<sup>nd</sup> time zone, 24-hour disc, Gyrotourbillon.

**Material available:** limited series of 75 pieces in platinum.

**Strap:** alligator leather.

**Case:** 51.2 x 31 mm.

**Water resistance:** 3 bar.

Ref. 394 64 20  
Platinum/leather

# Master Ultra Thin Minute Repeater Flying Tourbillon

*Non-stop repetition*

For this exceptional minute repeater watch, the Jaeger-LeCoultre artisans have developed an ingenious system that eliminates the usual silent timelapse between the hours and minutes when the watch does not strike the quarter-hours. The extremely intense sound chimed by the gongs is an auditory delight.

*State-of-the-art tourbillon*

Eager to provide the best possible view of the tourbillon, the Manufacture’s master-watchmakers have devised a flying tourbillon, fitted with a flying balance wheel, that ensures excellent timekeeping precision along with full visibility of the balance wheel and spring. It is a truly breathtaking balancing act.

*Dancing segment*

To preserve the slender lines of the case, the Manufacture’s watchmakers have invented an ingenious, peripheral automatic winding system, driven by a platinum segment that no longer oscillates beneath, but around the movement, as revealed through the openings around the dial rim.

*Jaeger-LeCoultre Calibre 362*

Automatic mechanical movement, 471 parts, 21,600 vibrations per hour, 45-hour power reserve.

**Functions:** hour, minute, minute repeater with pause reduction system, flying tourbillon with a flying balance wheel, peripheral automatic winding system.

**Material available:** limited series of 75 pieces in 18-carat extra-white gold.

**Strap:** alligator leather.

**Case:** 41 mm diameter.

**Water resistance:** 3 bar.

Ref. 131 35 20  
18-carat extra-white gold/leather

# Master Grande Tradition Gyrotourbillon 3 Jubilee

*Weightless Gyrotourbillon*

As if floating on air, this multi-axis tourbillon, or ‘flying’ tourbillon, is designed without an upper bridge, so as to facilitate unobstructed contemplation of the miniature planet. A gold balance-wheel and a blued spherical balance-spring appear between the two aluminium carriages.

*Counting off time*

Like the iconic 19<sup>th</sup>-century models, the chronograph is controlled by a monopusher. While the dedicated hand marks off the seconds, an aperture provides a numerical display of the elapsed minutes.

*Resolutely contemporary*

The surprisingly modern dial provides striking readability thanks to a play on depths, superimposed indicators, and finely crafted materials. This visual symphony notably features finely-toned, silver-grained or satin-finished dials, as well as hand-hammered movement bridges and plates.

*Tribute to Antoine LeCoultre*

Issued in a 75-piece limited edition, this extra-white platinum model pays eloquent tribute to the inventiveness of the Manufacturer’s founder, Antoine LeCoultre.

*Jaeger-LeCoultre Calibre 176*

Manually wound mechanical movement, 592 parts, 21,600 vibrations per hour, 2 barrels each with a 48-hour power reserve.

**Functions:** hour, minute. Flying Gyrotourbillon. Chronograph with an instantaneous digital display activated by a monopusher at 2 o’clock. Digital minutes display. Chronograph seconds indicated by a hand. Day/night indicator over 24 hours.

**Material available:** limited series of 75 pieces in extra-white platinum.

**Strap:** alligator leather, with adjustable folding clasp in 18-carat white gold.

**Case:** 43.5 mm diameter.

**Water resistance:** 5 bar.

Ref. 503 64 20  
Extra-white platinum/leather

# Duomètre Sphérotourbillon

*A bolt of precision*

A small seconds flyback system is activated with a push-piece, allowing the small seconds hand to return to zero without interrupting the flow of the regulating organ. This model is one of the few tourbillon watches that is precise to the nearest second.

*Sphérotourbillon in plain sight*

As though revealing a part of itself, the watch displays the spectacle of its multi-axis tourbillon in plain sight. In addition to the axis of its carriage, it possesses a second axis tilted at a 20° angle. This combination counteracts the negative effects of gravity in all positions.

*Light and shadow*

On the delicately grained dial, the indicators interlink side by side, creating an attractive depth effect. At 12 o'clock and 6 o'clock the leaf-shaped counters voluptuously hug the gold circle of the hours, minutes, and date indicator. Like a story within a story, the tourbillon is surrounded with steel and mineral enriched by nature.

*Jaeger-LeCoultre Calibre 382*

Manually wound mechanical movement, 460 pieces, 21,600 vibrations per hour, 2 barrels each with a 50-hour power reserve.

**Functions:** local hour, minute, small seconds with flyback, date, 24-hour reference time, flying tourbillon with cylindrical balance-spring, power reserve for the regulating organ, power reserve for the functions.

**Materials available:** limited series of 75 pieces in 950 platinum, 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 42 mm diameter, sapphire crystal case back.

**Water resistance:** 5 bar.

Ref. 605 25 20  
18-carat pink gold/leather

# Duomètre Sphérotourbillon Moon

*Journey to the moon*

Like a fascinating secret on the dial, the moon phase is poetically displayed in the hours and minutes indicator. The Manufacture’s artisans have created a star-studded sky set against the deep blue backdrop of a lapis lazuli disc, and have endowed it with a degree of precision that requires no further adjustment for 3,887 years. A dreamy thought indeed!

*From Earth to the Sphérotourbillon*

Like a dancer occupying centre-stage in an amphitheatre, the Sphérotourbillon, framed by stepped bridges forming a dramatic staircase, spins on an inclined axis as well as around its own axis. In doing so, it vividly evokes the Earth’s movement around the Sun. To prolong this intense, visual pleasure, a sapphire crystal on the side of the case provides a chance to view this display of watchmaking prowess from yet another angle.

*Terrestrial precision*

While this watch, equipped with the Dual-Wing concept, may have its head in the clouds, its feet remain firmly on earth as it offers to-the-second precision. A push-piece-activated flyback system for the small seconds serves to reset the small seconds hand without interrupting the smooth running of the regulating organ.

*Jaeger-LeCoultre Calibre 389*

Manually wound mechanical movement, 476 parts, 21,600 vibrations per hour, 2 barrels each with a 45-hour power reserve.

**Functions:** local hour, minute, small seconds with flyback, moon phases, 24-hour reference time, flying tourbillon with cylindrical balance-spring, power reserve for the regulating organ, power reserve for the functions.

**Material available:** limited series of 75 pieces in 950 platinum.

**Strap:** alligator leather.

**Case:** 42 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 608 65 20  
950 platinum/leather

# Reverso Répétition Minutes à Rideau

*When the curtain falls*

A flick of the finger is enough to slide the curtain that adorns this watch like a treasure. Surprisingly, when the curtain falls is precisely when the minute repeater ‘sound show’ begins. Devotees of rare objects cannot attempt to disguise their delight in this piece.

*Stunning surround sound*

To maximise auditory pleasure, the watchmakers of the Manufacture have devoted the keenest attention to the tune played by this minute repeater. Thanks to its trebuchet hammers and its monobloc alloys, made from a secret alloy, the sound is imbued with incomparable richness and purity.

*A play in two acts*

Adopting the emblematic design of the Reverso collection, this watch is fitted with two dials that are powered by a single movement measuring barely 5.9 mm thick. The openworked front and back of the watch reveal glimpses of finely crafted finishing and the movement's bridges.

*Jaeger-LeCoultre Calibre 944*

Manually wound mechanical movement, 340 parts, 21,600 vibrations per hour, 2 independent barrels, 35-hour power reserve.

**Functions:** front: hour, minute, minute repeater; back: hour, minute.

**Material available:** limited series of 75 pieces in 18-carat white gold.

**Strap:** alligator leather.

**Case:** reversible, comprising over 50 parts, size: 55 x 36 mm.

**Water resistance:** 3 bar.

# Master Grande Tradition Grande Complication

*Celestial tourbillon*

Just as the Earth orbits around the Sun, the sidereal celestial tourbillon, fixed to the dial by only one side, appears to be floating weightlessly among the constellations. A perpetually renewed vision of celestial beauty, it turns around the dial's face once a day.

*Cosmic chime*

To echo the sidereal dimension of this watch, the Jaeger-LeCoultre watchmakers have equipped it with a minute repeater that features exceptional sound quality. Thanks to its trebuchet hammers and ‘cathedral’ crystal gongs, the tone of the hours, quarters, and minutes is both intense and extremely rich.

*Starry sky*

The gaze is caught and held by the deep and subtle blue shade of the dial that reproduces the sky chart of the Northern hemisphere with its familiar constellations, such as the Big Dipper and Cassiopeia. The tiny sun, sweeping around the rim of the dial, indicates the day and month, as well as the corresponding zodiac sign.

*Jaeger-LeCoultre Calibre 945*

Manually wound mechanical movement, 527 parts, 28,800 vibrations per hour, 40-hour power reserve.

**Functions:** hour, minute; celestial sidereal tourbillon and sky chart; minute repeater with cathedral crystal gong; zodiac, months, date and 24-hour indicator; trebuchet hammers.

**Material available:** 18-carat pink gold.

**Strap:** alligator leather.

**Case:** 45 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

Ref. 502 25 80  
18-carat pink gold/leather

# Hybris Mechanica à Grande Sonnerie

*Big Ben chimes*

This unique watch, playing one of the longest melodies ever recreated by a Grande Sonnerie model, features a Westminster chime that echoes that of Big Ben. Equipped with four trebuchet hammers and crystal gongs, it emits a sound of rare richness and is capable of performing in Grande Sonnerie, Petite Sonnerie, minute repeater, and silent modes.

*To the tune of the tourbillon*

Suspended from a single bridge, the flying tourbillon is subtly revealed through the sapphire crystal case-back, like a delightful variation on a musical score. Its titanium carriage, which has been kept as small as possible, as not to conceal the regulating organ, pivots on a ball bearing mechanism.

*Perfect calendar harmony*

Like a subtle repeat at the end of a musical measure, the ‘retrograde’ calendar automatically resumes its path thanks to the jumping hand and marker on the date, month, and day indicators. The mechanism also takes into account leap years and requires no manual correction until the year 2100.

*Jaeger-LeCoultre Calibre 182*

Manually wound mechanical movement, approx. 1400 parts, 28,800 vibrations per hour, 2 barrels: 50-hour power reserve for hours, minutes and the perpetual calendar, 10 hours for the striking mechanism in Grande Sonnerie (grand striking) mode.

**Functions:** hour, minute, Westminster chime, 4 striking modes: Grande Sonnerie, Petite Sonnerie, Minute-repeater mode (with activation system on the crown push-piece), Silence. Flying tourbillon: balance with regulating screws, 28,800 vibrations per hour (4 Hz). Perpetual calendar, retrograde day, month and date indications, leap-year display.

**Material available:** limited series of 30 pieces in 18-carat white gold.

**Strap:** alligator leather.

**Case:** 44 mm diameter, sapphire crystal case-back.

**Water resistance:** 5 bar.

## Atmos

*This unique clock houses  
a breathtaking secret (literally!)*

The Atmos was born from a dream that was pursued by horologists for centuries, in the footsteps of Leonardo da Vinci. The dream was simple but distinct: to reproduce perpetual motion. Created in 1928, the Atmos continues to surprise modern observers by its inventive approach.

People say it lives on air because it is powered by temperature variations that cause a gaseous mixture inside a hermetically sealed capsule to expand or contract with each successive change. Thus, the mechanism is wound naturally, without human intervention. A single degree in either direction is enough to give it approximately two days of autonomy.

The subtle combination of classicism and modernity is the secret that makes the Atmos collection truly timeless. Its unique design provides a chance to observe the complexity of its gear wheels from all angles.

*An icon that keeps step with its time*

From Art Deco to contemporary art, Rare Handcrafts (“Métiers Rares”) to horological complications, the Atmos has consistently kept pace with each passing era while preserving its essence.

Creative minds inspire others. Great designers have joined Jaeger-LeCoultre in dreaming up limited series of this clock, successively reinventing it with each generation.

Presidents, prime ministers, artists, celebrities, and popes have all been recipients of the Atmos. For many years, the Atmos was the official gift of the Swiss Federal Government and thus, has come to adorn the desks of the great. It is with the help of this ageless clock that they have measured time.

# Atmos Classique Phases de Lune

*Minimalist movement*

Its entire secret lies in its movement. Suspended from a wire, thinner than a hair’s breadth and made from a metal alloy, the balance wheel swings slowly and majestically, keeping friction-induced losses to an absolute minimum. With an ultimate minimalist touch, the going train requires no lubricant to run smoothly.

*Perpetual complications*

This clock is sparing yet generous. Despite the small amount of energy at its display, it manages to indicate the month and moon phases in an impeccably reliable manner. A one-day difference every 3,861 years ensures a considerable worry-free length of time.

*Personalisation*

Is the clock intended to celebrate a momentous event? The Manufacture offers you an opportunity to personalise it, either by silkscreen-printing its glass cabinet with lettering or a motif, or affixing a gilt brass plate to its base.

*Jaeger-LeCoultre Calibre 562*

Mechanical movement, virtually perpetual, 231 parts, annular balance wheel, 60-second oscillation period.

**Functions:** hour, minute, month, perpetual moon-phase indication (one-day discrepancy every 3,861 years).

**Cabinet:** polished 18-carat pink gold-plated, polished 24-carat yellow gold-plated, polished rhodium-plated.

**Dimensions:** 200 x 155 x 225 mm.

# Atmos Marqueterie L’Attente

*Art first and foremost*

A faithful reproduction of Gustav Klimt’s mural fresco, *The Waiting* (*L’Attente* in French), the cabinet of the clock reflects the beauty of Art Nouveau. This work of art is composed of 35 types of precious wood that have been used to meticulously fashion its 1,400 parts.

*Opening to reveal the passing of time*

The Atmos masters the art of dramatic effect. At a mere press on a button, cleverly concealed beneath the ornamentation of this precious exterior, the ingenious cabinet opens to reveal the clock.

*Precious time*

When the marquetry cabinet slides open, the gaze is greeted by a dial covered with mother-of-pearl elements and graced with petrified wood hour-markers that reflect the warm shades featured in *The Waiting*. A cushion-cut yellow sapphire plays a surprise role as a 60-minute marker, while the finely gilded moon glides over a diamond-en-crusted petrified wood disc.

*Jaeger-LeCoultre Calibre 582*

Mechanical movement, virtually perpetual, 386 parts, annular balance wheel, 60-second oscillation period.

**Functions:** hour, minute, month, 24-hour indication, perpetual moon-phase indication (one-day discrepancy every 3,861 years).

**Cabinet:** over 1,400 interlocking wooden parts made of Camassari boxwood, Pau Amarelo wood, Andean boxwood, Ceylon lemonwood, Madrona burl, Amboyna burl, walnut, maple wood, and tulipwood. Decoration inspired by a painting by the Austrian artist Gustav Klimt: *The Waiting*. Inner cabinet: rhodium-plated and glass crystal. Rhodium-plated base and feet. Glass crystal door.

**Dimensions:** 321 x 171 x 257 mm. Limited series of 10 pieces.

Ref. 554 33 07

# Atmos Marqueterie Céleste

*Like a gift from above*

The cabinet's deep blue straw marquetry, with protruding angles that create a pyramid effect, resembles a rough stone that has fallen from the heavens. This stunning ornamentation reflects the timeless dimension of the Atmos concept, which literally lives on air.

*Lunar complication*

Alongside the month and day/night indications, one particular complication was a must-have for this Atmos: a moon-phase display. This poetic indication appears decked out in precious mother-of-pearl against a lapis lazuli background, which echoes the intense blue shade of the cabinet. It takes its place within a symbolically sidereal timeframe, requiring only one correction every 3,861 years.

*Moonglow*

Just one gentle press and the cabinet opens to reveal the clock, as if unveiling the night sky. The dial, clothed in mother of pearl marquetry, shimmers and shines like the subtle halo surrounding the moon.

*Jaeger-LeCoultre Calibre 582*

Mechanical movement, virtually perpetual, 386 parts, annular balance wheel, 60-second oscillation period.

**Functions:** hour, minute, month, 24-hour indication, perpetual moon-phase indication (one-day discrepancy every 3,861 years).

**Cabinet:** exterior in straw marquetry. Inner cabinet: rhodium-plated and glass crystal. Rhodium-plated base and feet. Glass crystal door.

**Dimensions:** 331 x 189 x 256 mm. Limited series of 8 pieces.

# Jaeger-LeCoultre at your service

---

*To extend the history, which binds us, we remain  
at your entire disposal to advise you on the care,  
restoration, or personalisation of your watch.*

## A full service

*Your watch is a high-precision mechanism; taking care of it is important.*

Your watch ticks away 24 hours a day, 7 days a week, uninterrupted. Since these seconds represent thousands of hours of functioning, regular in-depth maintenance is required.

The frequency of maintenance depends on the model, the way it is used, and the climate. From the moment the rate of your watch starts to significantly vary, we recommend that you entrust it to us for a full service.

Our watchmakers will disassemble it completely. Then, they will polish the case, change the seals, and clean all the parts. Some parts may need to be replaced. The movement is then oiled, adjusted, and checked. Once it is reassembled, your watch undergoes a seal-check test and a final check, conducted from both a functional and aesthetic standpoint.

The replacement of the crowns, pushbuttons, or correctors is not included in the full service.

It is recommended to have the water resistance of your watch checked by one of our service centres, Boutiques, or an authorised Jaeger-LeCoultre retailer once every two years or prior to any period during which it will undergo prolonged and/or regular immersions.

## Restoration

*Restoring your antique watch to its former splendour, such is the mission of our watchmaker restorers.*

Restoration is not only about getting your movement working again. It is also about restoring the watch to its original appearance, so that it retains its authenticity and identity. Certain antique watches may be in a very advanced, worn condition. Watchmaker restorers refurbish or change every part, or even remake them if necessary. A multitude of highly specific operations are performed to return every piece to its former splendour.

You'll find the addresses of all our technical assistance centres, Boutiques, and Jaeger-LeCoultre points of sale on our website:  
[www.jaeger-lecoultre.com](http://www.jaeger-lecoultre.com)

## The 1000 Hours Control

*Before leaving the Manufacture, all our watches are tested by our watchmakers for 1000 hours.*

Unceasingly in search of new challenges, over 20 years ago our watchmakers implemented a quality control test that was more comprehensive and more rigorous than the various existing certifications.

Initiated in 1992, the "1000 Hours Control", which is exclusive to the Jaeger-LeCoultre Manufacture, consists of a series of rigorous tests conducted on various aspects of reliability: water-tightness, resistance to varying temperatures (+4°C and +40°C), resistance to shocks, magnetic fields, etc.

This inspection is complemented with functionality testing in six different positions, as well as a wearer simulation and aesthetic check.

Please consult our website for further information:  
[www.jaeger-lecoultre.com](http://www.jaeger-lecoultre.com)

500,000,000

This is the average number of micro shocks to which your watch will be subjected every year. The "1000 Hours Control" stamp certifies that each piece has been tested and checked with the greatest care.

# At your service. All over the world.
